Certification Test Report on Omnigate DNA Messaging From Advox AB

1 ABSTRACT

Testing took place at Ericsson's laboratories in Nacka Strand on 2002 September 24th

1.1 Persons Involved

Ericsson	Nadia Shamdani
Advox AB	Jan Blomqvist

1.2 Software Levels

MD110 Standard Application Software	version: - BC10 and all related patches.
MD110 Standard Application Software	version: BC11 and all related patches.
D.N.A. Server 5.0	- Windows NT 4.0 Server, SP6 - SQL Server 7.0, SP3 - DNA 5.0, SP6
D.N.A. Client 5.0	- Windows 2000 Server, SP2
Advox Omnigate DNA server	- Windows 2000 Server, SP2 (Installed on D.N.A. Client)
Advox Omnigate ECA interface - Windows NT 4.0 Server, SP6	(Installed on D.N.A. Server) (must be installed on ECA server)

1.3 Hardware Levels

MD110 PBX

D.N.A. Server 5.0 - 450MHz Pentium PC with 392MB RAM

D.N.A. Client 5.0 - 450MHz Pentium PC with 392MB RAM

Prepared (also subject responsible if other) NA/EBC/BEES/DNIG Nadia Shamdani		No. BEES/YR 2002:076		
Approved NA/EBC/BEES/PR Kent Holmblad	Checked	Date 2002-11-14	Rev A	Reference Advox AB

Advox Omnigate DNA - 450Mhz Pentium PC with 392MB RAM

Approximately 50 MB for the software and at least 50 MB free for mail exchange.

2 TEST PLAN

Number: BEES/YR 2002:075

2.1 Test Cases Not Performed

Not applicable

2.2 Failed Test Cases

Not applicable

2.3 Faults Found on Ericsson Equipment

Sending messages via MAPI using the Swedish version of OWS doesn't work.

A fault report has been created, and the designers have been informed about the faults.

All other tests passed without any remark/observation.

2.4 Test Notes

This Certification does only apply to the database part of the DNA concept

For completeness, the reader is also advised to refer to the completed Certification Test Plan which, contains test comments and/or detailed notes

3 Result Certification Awarded

3.1 Certified

Means the interface between the non-Ericsson product and the Ericsson product is compatible i.e follows Ericsson's and/or telecommunication industry's prescribed specifications and does not generate frequent faults or system issues. Certification is not a -quality assurance- seal, does not imply the inter-connection is -fit for all purposes- and does not certify the quality of the certified Product(s) or ensure that it is 'bug free'.

The conditions for the legitimacy of the Certification are:

- i. The configuration, hardware and software levels are in accordance with those at the time Certification Testing occurred:
- ii. The end user usage does not depend on failed test cases cited in the Certification Test Report:
- iii. The end user usage does not depend on test cases not contained in the Standardized Test Plan: and
- iv. The Participant has submitted to Ericsson an official statement attesting that following the subsequent release of either
 - a) an Ericsson, MD110-CNI and/or an Application-Service Pack, or
 - b) a new software level of the participant's own Product;the Participant has
 - a) repeated the original Standardized or Bespoke Test Plan, and
 - b) substantiated no further negative outcomes beyond that previously recorded in either the relevant Standardized or Bespoke Test Plan or Certification Test Report.

Certification testing is performed using the Ericsson MD110 Standard Application System and some instances may require market specific test(s) to ensure the legitimacy of the "Certification".

4 Distribution List

4.1 For your Information
